

SCIENCE.

PERCUSSION IN PILE-DRIVING.—Thomas Shaw at Philadelphia has successfully applied the principle of percussion to pile driving. A strong cylinder is attached to the pile head. The plunger is provided with a piston that fits loosely into the bore of the cylinder. A pistol charge of powder, wrapped in the form of a cartridge, is thrown into the cylinder, the plunger disengages, igniting the powder by percussion, and forces the pile, by a steady push, fully three times further than would be done by the same weight of plunger without the use of the powder. The plunger is carried back to its place by the elasticity of the gunpowder used to descend upon another charge. The machine is therefore perfectly automatic. Only an attendant is required, who throws in the powder at every stroke. A percussion engine may be constructed on the same principle, and is successfully employed in forging heavy masses of iron.

EDDIE-WEASEL:

A STORY.

By ALEXANDER. Translated by HENRY FROTHOMAS. (Handy Volume Series.) Price in cloth, 75 cents.

THE HANDY VOLUME SERIES.

Very pleasant and easily读的 books entitled "the Handy Volume Series," which have been published by Houghtaling Brothers, of Boston. The choice of books has been as judicious as the exteriors of the publications are attractive. The opening pages will give a general idea of railway travelers and loungers in the country, and may be of great value to the reading public that all subsequent volumes of the series will be equally interesting. The author of "Eddie-Weasel" was born in Boston, and was educated at Harvard. He is now a student at the University of Cambridge, and has written a book entitled "Eddie-Weasel," which he has given to his teacher, Dr. Jacob's, and "Planchette, the Genius of Science." The latest title is "Eddie-Weasel," a novel by the great German novelist, Auerbach. The book is well written, and the illustrations are excellent, which characterized that striking story belong to this little romance. The translation by Eliza Prichard is easy and graceful, and an air of reality to the original.—New-York Evening Post.
